From Our Pastor

With Palm Sunday, we enter into Holy Week. This most sacred week of the year begins with the recollection of the Passion of Our Lord. Let us walk with Jesus as he enters Jerusalem with the celebration of palms and goes to his crucifixion on Friday, dying for our sins.

At the end of Holy Week is the Sacred Triduum, or three days, marking the Lord's Supper, his Crucifixion and Resurrection. Join us for the special liturgies this week.

The Mass of the Lord's Supper is Holy Thursday at 7:00 PM.

The Crucifixion is celebrated on Good Friday with the Liturgy of the Passion and Communion at 3:00 PM. We will also have Stations of the Cross on Good Friday at 12:00 PM and 7:00 PM. The Lord rests in the tomb on Holy Saturday, but we anticipate the Resurrection with the Easter Vigil celebrated Saturday night at 8:00 PM. We have several adults and children being baptized and received into the Church that night.

On Easter Sunday, we celebrate our regular Sunday morning Masses at 8:00 AM and 10:00 AM. There is no evening Mass on Easter Sunday.

In addition to the regular Saturday confessions, we continue to add confessions after all Sunday Masses on Palm Sunday. Confessions will also be heard on Good Friday before Stations and after the Liturgy of the Passion. Confessions will be heard beginning at 11:30 AM, 4:00 PM, and 6:30 PM. Confessions will continue as long as necessary.

At the beginning of last week, we replaced the flat portion of the roof over the narthex of the Church. This flat portion of the roof has carried a lot of water pouring down from the angled roofline for 20 years. There have been leaks in this part of the roof for the past many months. Drawing upon our savings, we have replaced this portion of the roof to avoid water damage in the future.

You are invited to support our school and PTO by joining in the pancake breakfast this weekend. Pancakes will be served in the school cafeteria after morning Masses.

- Msgr. Gray

The **St. Thomas Food Pantry** offers an excellent opportunity for students needing service hours! On Monday and Thursday mornings, federal holidays excepted, the pantry distributes groceries to our neighbors in need. Packing groceries, registering pantry guests, restocking shelves, repackaging food and assisting guests to their vehicles are tasks that students will perform while under adult supervision. An additional service opportunity occurs one Thursday per month when we receive a truckload of food products from Midwest Food Bank. On these days, students help adult volunteers unload the truck, repackage food, rotate stock and stock shelves. Students interested in earning service hours at the food pantry this summer should contact Diana Janda at dianajanda1964@gmail.com.

Opportunities Available:

Monday and Thursday mornings – 8:30 a.m. to 11:30 a.m.
June 3rd through August 15th

Monthly Food Delivery – 1:30 p.m. to 3:30 p.m.
Dates are Thursdays June 13th, July 11th and August 15th

Holy Hour for the Rights of the Unborn

Monday, April 1st, 2024, 7:00 p.m.
Saint Mark Church
1113 W. Bradley Avenue, Peoria

Holy Hour consists of Benediction, the Rosary, and other prayers. Please join us in prayer for the protection of these innocent lives and the restoration of their Constitutional rights.

In vain will the world seek for equality until it has seen all men through the eyes of faith. Faith teaches that all men, however poor or ignorant, or crippled, however maimed, ugly, or degraded they may be, all bear within themselves the image of God, and have been bought by the precious blood of Jesus Christ. As this truth is forgotten, men are valued only because of what they can do, not because of what they are.

~ Fulton J. Sheen

March is Autoimmune Awareness Month

Chances are, you know someone who is living with an autoimmune disease.

Facts About Autoimmune Disease

- An autoimmune disease is a condition in which the immune system mistakenly attacks and damages healthy body tissue and cells, rather than protecting the body as it was designed to do. The exact cause of autoimmune diseases is not fully understood, but they are thought to result from a combination of genetic and environmental factors.
- Approximately 50 million Americans are living with autoimmune disease.
- There are more than 100 known autoimmune diseases.
- 80% of people living with autoimmune disease are female.
- Autoimmune disease tends to cluster in families. If one person in your family has an autoimmune disease, it's likely that someone else does, too — although they might not have the same disease.
- On average, it takes 4.5 years and 4 physicians to receive a diagnosis.
- Autoimmunity is now one of the most common disease categories, ahead of cancer and heart disease.
- 25% of people living with autoimmune disease have multiple diagnoses, and certain diseases tend to cluster with others.

Approximately 50 million Americans have been diagnosed with at least one autoimmune disease, not to mention those who are still searching for a diagnosis.

With over 100 autoimmune diseases and many occurring in clusters, familiarizing yourself with the various autoimmune diseases is a great way to increase your autoimmune understanding.

Some of the more common autoimmune diseases include type 1 diabetes, rheumatoid arthritis, systemic lupus erythematosus, and inflammatory bowel disease.

Other common conditions which are actually autoimmune diseases include

Endometriosis
Meniere's disease
Narcolepsy

Raynaud's phenomenon
Restless legs syndrome

Although the causes of many autoimmune diseases remain unknown, a person's genes in combination with infections and other environmental exposures are likely to play a significant role in disease development. Treatments are available for many autoimmune diseases, but cures have yet to be discovered.

The chronic and debilitating nature of these diseases, which can lead to high medical costs and reduced quality of life, is a burden on patients and also affects their families and communities. Although researchers have made considerable progress in understanding how the immune system causes organ, tissue, and cell injury in autoimmune diseases, much remains to be learned. By supporting a broad range of basic, preclinical, and clinical research in autoimmune diseases, NIAID enhances understanding of the causes of these diseases, the genetic factors that make people susceptible to them, and the regulatory mechanisms that control the production of self-destructive antibodies.

NIAID-supported research on autoimmune diseases focuses on the immunologic basis of disease, including developing a greater understanding of the fundamental immunologic principles underlying disease onset and progression, developing improved animal models of disease, developing improved diagnostic tools, and identifying and evaluating more effective immune-based treatment and prevention strategies.
